

NORDICHUB

NordicHub is a platform for Finnish cluster activity and a Nordic network for Finnish clusters. Our goal is to connect and highlight Finnish clusters, and to provide the clusters with relevant information and networking possibilities both nationally and internationally. Cluster representatives can get necessary advice via NordicHub. We also arrange different cluster events, such as, webinars, trainings, and cluster trips.

Why should your cluster join NordicHub's network?

- You are first to get information about cluster events, such as, webinars, trainings, and trips. The events offer relevant information and peer learning as well as networking possibilities both nationally and internationally.
- You get visibility both nationally and internationally. We will add your logo to NordicHub's website and to our presentation materials.
- We are stronger together! It would be important that all the clusters in our country would be known and gathered in one place in order to promote Finnish cluster activity. Our goal is that all Finnish clusters would be part of NordicHub's network.
- It is free of charge to join the network. We only need your cluster's logo and website for the visibility. We also need your contact person's contact details in order to communicate, the contact details will not be published.

More information about NordicHub on our [website](#) and on social media; [LinkedIn](#), [Facebook](#) & [Instagram](#)
